

Dear Parents,

My name is Mrs. Williams and I teach Family and Consumer Science at Central Middle School. As the syllabus describes, we are getting ready to start Unit 19. I wanted you to be aware of some delicate conversations we will be having in class and hope that you will visit with your student as we cover the Unit. You may also come in and view the Unit in its entirety. The syllabus I sent home at the beginning of the year describes the Unit as: Understanding physical development which includes identifying the types of adolescent physical changes associated with the female and male reproductive organs and their correct functions. The chapter covers common sexually transmitted diseases with their correct descriptions as well as methods of contraception and their correct descriptions. If you DO NOT want your student to cover this Unit I will assign them another Unit and they can work independently next door in Mrs. Porter's room.

Sign IF YOU **DO NOT** WANT YOUR CHILD TO DO UNIT 19 IN FACS 1A CLASS

Student Name:
