

UNIT 1 - BODY PLAN AND ORGANIZATION

ACTIVITY – Teacher Says

This is a simple reinforcement activity that can be used at varying times through the year to help students remember the directional terms.

Using the rules to the children’s game, “Simon Says”, have the students all stand by their desks and the teacher then gives terms using hand motions related to the direction. The teacher tries to trick the students who one by one take their seats as they make mistakes in the directions. The last one standing wins.
