

UNIT 12 - REPRODUCTIVE SYSTEM

ACTIVITY - The Male Reproductive Organs

Objectives:

Students will identify the male reproductive organs and will trace the path of the human sperm cell from cell division to expulsion from the body.

Materials:

Markers

Paper

Strategy:

The students will trace the journey of the sperm from the testes to the outside of the body. The organs and accessory organs will be correctly identified and the function of each explained.

Include the following:

Scrotum

Epididymis

Seminal Vesicle

Ejaculatory Duct

Testes

Urethra

Prostate Gland

Ureter

Vas Deferens

Cowper's Gland

Urinary Bladder

Glans Penis
