

UNIT 3 - CELLS, HISTOLOGY, INTEGUMENTARY SYSTEM

ACTIVITY - Cells and Food

(This assignment may be completed in the classroom or by the students at home.)

Students are encouraged to use food to represent different parts of the cell. The cell membrane, nucleus and organelles should be identified. Examples could include: cell pizzas, cell cookies, cell cakes, cell bagels or cell Jell-O. Encourage the student to use their own creativity to make a cell. If using a cell matrix with a liquid base caution the students that items made with sugar used for organelles may dissolve.
