

## UNIT 8 - BLOOD / LYMPHATIC / CARDIOVASCULAR SYSTEMS

### ACTIVITY - Lymph Review Game

**Objective:** Students will review the vocabulary associated with the lymphatic system.

**Strategy:** Divide the students into two groups. Put the vocabulary words on index cards or have students do this ahead of time. Next put a number on the other side of the card. Have the group choose a captain for each team. The captain will choose a number for the team. The team then has to define the term. If they can not define the term then the other team gets a point, but the term goes back into the stack until someone gets it correct. The team with the most points at the end gets extra points added to the test or a treat (this is your choice).
