H5P Training Series:
16—Mark the Words

In this tutorial, you will learn how to create an H5P Mark the Words activity.

IMPORTANT: Be sure to abide by copyright laws when developing learning activities based on content you do not own. See the link under the Additional Resources section for information.

Table of Contents

1. Overview of the Mark-the-Words Content Type

The H5P Mark-the-Words content type requires users to indicate words in a phrase according to the task description.

IMPORTANT: Before creating any H5P element, turn on editing for your course site. Under the section or topic where the H5P element will appear, click the **Add an activity** dropdown menu and choose **Interactive Content** from the list. Save your work periodically, and try out the features as you create them to help you understand how they function.

Note: See tutorial **0—General H5P Settings** for instructions on how to set up H5P activities for grades and other information.

2. Adding a Mark-the-Words Activity

The following steps walk you through the process of adding a Mark-the-Words activity:

Step	Action	Notes
1.	In the **Name** field, type in a name for the H5P interaction.	For training purposes, type: Mark the Words.

Step	Action	Notes
2.	In the **Editor** section, select **Mark the Words** from the list of content types. When selecting this H5P activity for the first time, click the **Use** button.	The editor should appear.
3.	Write instructions for the user in the **Task description** field.	For training purposes, type: Click on the names of fruits and vegetables mentioned in the text below.
4.	Enter the question text into the **Textfield.**	The screen shows the following instructions for the **Textfield:** • Correct words are marked with asterisks (*) before and after the word. • Asterisks can be added within marked words by adding another asterisk, *correctword*** => correctword*. • Only words may be marked as correct. Not phrases. For training purposes, type: Alicia found a recipe online and is making a grocery list. The recipe calls for *broccoli*, butter, *spinach*, rotini pasta, olive oil, *lemon*, and parmesan. Because she already has a few of these ingredients, she only needs to add the fresh produce items to her list.
5.	Click **Save and display** at the bottom of the screen when finished editing.	This step applies when using H5P content in Moodle or ctYOU.org. Saving may be different in other applications.

IMPORTANT: Be sure to test all of the multimedia elements you created for this tutorial. Once completed, you can use this H5P feature as a standalone, embed its iframe code in a webpage, or you can download it for use in another courses.
