

## Make logging in easy for young learners.

Logging into Kuder Galaxy is easier than ever with fillable student login cards to ensure your students never forget their login credentials. Follow these instructions to create customizable login cards for each of your students:

- 1 Download and open this document in any PDF viewer. Fillable fields allow you to quickly input student information, including name, email account, and Kuder Galaxy password. You can also fill out this administrator login card for your own use.
- 2 Print your completed sheets off on cardstock or durable paper. If you need to add more students, simply fill out the sheet again, save under a different file name, and print off the second page of this document.
- 3 Cut out each card along the dotted lines. We recommend using a paper trimmer or other commercial paper cutting equipment to speed up the process.
- 4 These wallet-sized login cards are perfect for inserting in a lanyard badge, pencil case, or laminating! To better keep track of your students' cards, you can distribute and collect them during each session.

Ready for blastoff!
