

GRADES

9-12

National Aeronautics and Space Administration

- Scientific Thinking
- Constant Velocity
- Uniform Acceleration
- Terminal Velocity
- Force Particle - Inertia
- Constant Net Force
- 2-D Combination
- Energy
- Rotational Motion

$$F_L = \frac{1}{2} C_L \rho v^2 A$$

$$F_g * c_g = \text{SUM}(i=1 \text{ to } i=n) [F_g * d]_i$$
