Substitutions for cream of tartar.

Equal amounts of white vinegar and lemon juice as recipe calls for. So for this recipe you would use 1 T. of the vinegar or juice instead of the cream of tartar.

To substitute baking powder you need to increase the amount of baking powder by 1.5. For example the above measurement of 1 Tablespoon also equals 3 teaspoons. So the amount of baking powder needed would be 4 ½ teaspoons of baking powder instead of the 3 teaspoons of cream of tartar.
