Graph of the Week

October _____, 2020

Name_____

Analyze the graphs below and write a reflection on what you think the graphs are communicating to you. To guide you with your response, start with some observations.
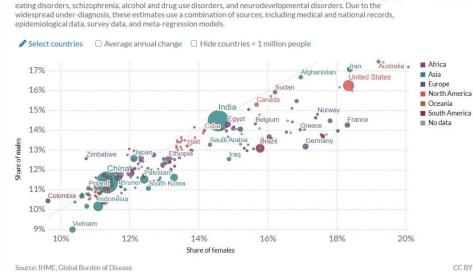

- What are the topics of the graphs?
- What quantities are being compared? (If there are x- and y- axes, what do they represent?)
- What are some observations that you can make based on the graphs?
- What do you foresee happening in the next 10 years?

Covid-19's Widespread Impact On Mental Health

Share of adults who experienced stress, anxiety or sadness that was difficult to cope with alone during the pandemic

Country	%
United States	33%
Canada	26%
United Kingdom	26%
France	24%
Australia	23%
New Zealand	23%
Sweden	18%
Netherlands	14%
Norway	10%

n=8,259 (February to June 2020)
Source: The Commonwealth Fund

statista

Share of population with mental or substance disorders, male vs. female, 2017

Share of males vs. females with any mental health or substance use disorder; this includes depression, anxiety, bipolar, eating disorders, schizophrenia, alcohol and drug use disorders, and neurodevelopmental disorders. Due to the widespread under-diagnosis, these estimates use a combination of sources, including medical and national records, epidemiological data, survey data, and meta-regression models.

Our World in Data

✎ Select countries   ☐ Average annual change   ☐ Hide countries < 1 million people

- Africa
- Asia
- Europe
- North America
- Oceania
- South America
- No data
