Graph of the Week

May _____, 2021

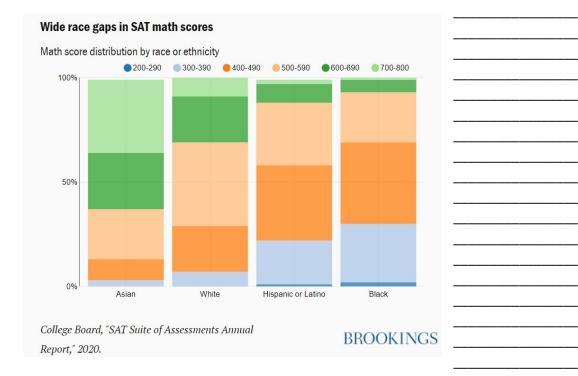

Analyze the graphs below and write a reflection on what you think the graphs are communicating to you. To guide you with your response, start with some observations.

- What are the topics of the graphs?
- What quantities are being compared? (If there are x- and y- axes, what do they represent?)
- What are some observations that you can make based on the graphs?
- What do you foresee happening in the next 10 years?

Questions to ask when reading graphs:

Name

- > Is there an upward or downward trend?
- Are there any sudden spikes in the graph?
- What is being compared in the graph?
- What prediction can I make for the future?
- What inferences can I make about the graph?

Average SAT scores increase with family income United States, 2016 More than \$200,000 About \$140,001 to \$200,000 About \$80,001 to \$100,000 About \$40,001 to \$80,000 About \$40,001 to \$80,000 About \$40,001 to \$80,000 About \$20,000 to \$40,000 Less than \$20,000 Note: Scores adjusted to 2018 scale.
