They are free for educators. There are two seminars left. Tips from The Orange Cup

This is the prime time for many of our favorite fruits and vegetables to be ripe and ready for us to enjoy. Are you storing your harvest properly so that you get the most flavor and nutrition? Take a look at the attached handout and see if you are using room temperature and refrigerator storage to their best advantage. One important statement is the last statement of the handout..."refrigerate all cut, peeled or cooked fruits and vegetables within 2 hours" no matter what type of storage was best prior to cutting, peeling or cooking.
