

How Do I Prepare for My Career?

Mapping Out a Plan - Goals in Journey

If you take a road trip, you probably program a GPS to help map the route you will take to reach your destination. An Individual Career Academic Plan serves the same purpose. You program the tech center/college courses or steps you need to take to meet your career goals.

What happens if you change your mind? No problem. Just like the GPS system, you can recalculate the courses and steps you need to get you on track for your new career choice.
