K12 End-of-Course Test Collection

Information Management has opened a new collection module, the Certification System, for you to enter end-of-instruction certifications in real time. We are now collecting this information for all students. We are asking you to add your students' test results at any time throughout the year rather than waiting for follow-up to open. Once your test data is entered in the Certification System module, it will transfer over to the Follow-up module. For example, if you enter the certifications results for your current students, it will populate in follow-up for the next collection period. (NOTE: Verify you are entering information in the correct enrollment year.)

The technical guidebook is available on the [CTIMS website](#). If you have any questions, please contact support at ctimssupport@careertech.ok.gov or 405.743.5134.
