

ai resources for the classroom

[Brisk - Google Extension \(GET IT\)](#)

Google extension for educators that can create educational materials: worksheets, slides, tests, lesson plans, activities, etc.; gives feedback; differentiate texts to meet different reading levels, grades based off rubrics you upload, and more! In fact, it created this entire slide deck about the benefits of Brisk:

🌐 [The Amazing Benefits of Brisk Extension for Educators](#)

[Chat GBT](#)

Microsoft hosted AI that answers questions from student-created prompts.

[Gemini](#)

Google-hosted AI that answers questions from student-created prompts.

[Unstuck AI](#)

Unstuck AI for Study Support: This is an educational tool that allows students to upload various study materials, such as PDFs, PPTs, lecture notes, and even YouTube videos, and interact with them through an AI chatbot. It uses GPT-4 and other advanced AI models to help students by answering questions, providing citations, and enabling exam preparation. The platform is designed to make studying more efficient by directly referencing students' course materials and providing high-quality, accurate responses. This tool was first launched in January 2023 and is aimed at making learning more personalized and accessible.

[Perplexity](#)

A generative AI that helps students gather reliable research on topics quickly. This AI is suitable for academic research as it provides citations for its answers, and helps users to fact-check and verify sources easily.

[Khan Academy AI - Khanmigo](#)

An education based AI that helps teachers plan, create, differentiate, and support their learners of all levels.
